Kjaerhus Audio Launches Classic Delay – A free Delay Plugin

Kjaerhus Audio has released a new free VST plugin in there Classic Series, the Classic Delay.

The Classic Delay emulates three of the most commonly used delays / echo sounds types: Tape, Analog, and Digital, but without the introduction of noise. A quality control is included where the sound of the echo machine can be adjusted to give the preferred amount of “imperfection”. The delay can be synchronised to the host, and the feedback can be reversed to give a ping-pong effect.

The Classic Series now includes eight quality VST plugins that can be downloaded for free at Kjaerhus Audio’s web site.

For more information, visit the Kjaerhus Audio web site at <http://www.kjaerhusaudio.com>

About Kjaerhus Audio

Kjaerhus Audio was founded April 1, 2003 by Torben Kjaerhus Larsen in Denmark. Kjaerhus Audio’s main focus is designing software solutions for computer based audio processing and production. The products are developed to meet the demands of the Professional and Semi-professional (ProSumer) sound studio, and also the enthusiastic hobbyist.
